The Texas Bioscience Institute Middle College program offers highly motivated high school students the opportunity to earn up to 60 college credit hours in a STEM-focused (Science, Technology, Engineering and Math) foundational curriculum. Many program participants earn an associate degree from Temple College before they even graduate from high school!

Students interested in attending the TBI Middle College program are required to meet certain admissions requirements. Admission to the TBI program is competitive, so meeting the minimum qualifications does not guarantee acceptance to the program.

1. Students are required to be entering juniors.
2. Students must have taken Pre-AP Algebra II, Biology I and Chemistry I before entrance into the TBI. These three classes must be completed with an 80 or higher average.
3. Students must pass a college readiness exam: TSIA, SAT, ACT, etc.
